**FUNKS 1934 CROP SEED CORN TREATED with STANDARD SEED TREATMENT**  
Funk Bros. have always treated Hybrid Seed Corn before shipment. Just an additional insurance on a product already known to be superior.  
Seed treatment is recognized to be of greatest value when spring weather is unfavorable. On the average good Corn Belt Farm treated seed corn usually increases the yield about 10 per cent. Additional insurance is the reason why we are treating all of our 1934 crop seed corn before shipment.
